**SMALL FIRE**

Use dry chemical, CO<sub>2</sub> or water spray to extinguish burning gas if safe to do so.

**DO NOT USE WATER JETS.**

**LARGE FIRE**

Cool container by directing flooding quantities of water onto upper surface until well after fire is out - DO not direct water at source of leak or venting safety devices as icing may occur, which could then cause a pressure build up and consequently an explosion could result.

Cool container and fight secondary fire from protected position or use unmanned hose holders - When impossible, withdraw immediately from hazard area and let burn.

Withdraw immediately in case of rising sound from venting safety devices or discolouration of tank - tank may explode.

**ALWAYS** stay away from tank ends.

Damaged containers should only be handled following expert advice.

**FLAMMABILITY**

Avoid all sources of ignition, heat and naked flames.
