

# Application Driven Eddy Current Solutions

*UniWest.*

# 4D Rapid Prototype Process

## Innovative Designs...

UniWest uses a unique 4D Rapid Prototype system to solve special application problems:

- Define customer's application problem
- Design product solution
- Develop prototype
- Deliver turn-key solution

UniWest has been using this process to produce hundreds of new, innovative eddy current products for the world's leaders in aerospace, power generation and general manufacturing.

## Creative Engineering...

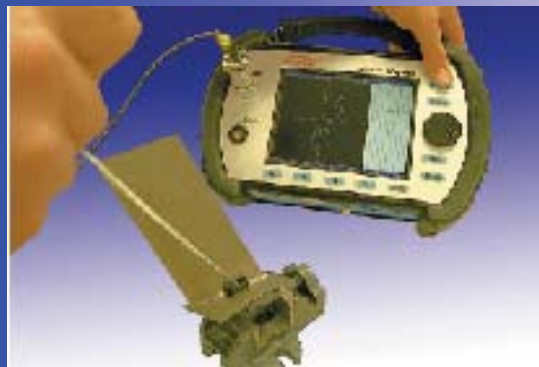

If you have an NDT challenge and need innovative solutions, give us a call. Solving problems... it's what we do.

## Quality Fabrication...

## Fast Delivery...

UniWest produces laboratory and hand held eddy current instruments, automated scanner systems, portable scanners, special application probes, standard probes and bond testing products. For more information on application driven solutions give us a call or go to our web site listed below. We'd love to help you solve your next NDT problem.
